

This listing of claims will replace all prior versions and listings of claims in the Application.

LISTING OF CLAIMS

1. (Currently Amended) A polishing implement for polishing a shoe comprising:

a structure to be handheld, provided with an absorbing fiber layer for forming a first polishing layer; and

a removable sachet provided on or to be provided on the structure that covers the first polishing layer at least partly, so that only after removal of the sachet, the first polishing layer is completely revealed, ~~for containing the polishing product, wherein the sachet comprises~~ comprising:

a fiber layer impregnated with a polishing product forming a second polishing layer; and

a protective layer;

~~, screened off,~~ wherein, in a closed condition, the second polishing layer is covered by [[a]] the protective layer, and while, in an opened condition, the impregnated fiber layer forms a second polishing layer is exposed for applying the polishing product to the shoe.

2. (Cancelled)

3. (Currently Amended) A polishing implement according to claim [[2]] 1, wherein the polishing implement comprises an impermeable layer to which the sachet is attached to the structure, which the impermeable layer [[has]] having a surface greater than the sachet.

4. (Currently Amended) A polishing implement according to claim 1, wherein in the opened condition, the sachet ~~reaches~~ extends beyond an edge of the structure.

5. (Currently Amended) A polishing implement according to claim 1, wherein ~~the sachet comprises a protective layer and, attached thereto, a fiber layer saturated with polishing product,~~

while in the closed condition, the protective layer is folded over and is sealed off along [[the]] its edges, while the sachet is provided on the structure on one side of the fold.

6. (Currently Amended) A polishing implement according to claim 5, wherein the sachet is attached to a bottom side of the structure and, in use, in the opened condition, ~~reaches~~ extends beyond [[the]] an edge of the structure and, when folded back, ~~can be a portion of the sachet is~~ attached to a top side of the structure.

7. (Previously Presented) A polishing implement according to claim 1, wherein the structure comprises a glove.

8. (Previously Presented) A polishing implement according to claim 1, wherein the structure comprises a handle and a relatively flat part forming a base for the sachet.

9. (Currently Amended) A sachet for a polishing implement according to claim 1, wherein ~~the sachet comprises a fiber layer impregnated with polishing product and, in closed condition, screened off by a protective layer, while in opened condition, the impregnated fiber layer forms a~~ second polishing layer for applying polishing product to the shoe comprising:

a fiber layer impregnated with a polishing product forming a polishing layer;

a protective layer; and

a portion for removeably attaching to a structure;

wherein, in a closed condition, the polishing layer is covered by the protective layer, and while, in an opened condition, the protective layer is folded back and the polishing layer is exposed for applying the polishing product to the shoe.

10 (New) A sachet for a polishing implement according to claim 9, further comprising a grip.

11. (New) A polishing implement according to claim 6, wherein the sachet, when folded back, the portions of the sachet is attached to the top side of the structure by a removable fastener.
12. (New) A polishing implement according to claim 11, wherein the removable fastener is one of a hook and fastener or an adhesive.
13. (New) A polishing implement for polishing a shoe, comprising:
- a structure to be handheld, provided with an absorbing fiber layer for forming a first polishing layer; and
 - a sachet provided on or to be provided on the structure, the sachet comprising:
 - a fiber layer impregnated with a polishing product forming a second polishing layer; and
 - a protective layer;
 - wherein, in a closed condition, the second polishing layer is covered by the protective layer, and while, in an opened condition, the protective layer is folded back and the second polishing layer is exposed for applying the polishing product to the shoe.
14. (New) A polishing implement according to claim 13, wherein the sachet is removable and covers the first polishing layer at least partly, so that only after removal of the sachet, the first polishing layer is completely revealed.
15. (New) A polishing implement according to claim 13, wherein the polishing implement comprises an impermeable layer to which the sachet is attached to the structure, the impermeable layer having a surface greater than the sachet.
16. (New) A polishing implement according to claim 13, wherein in the opened condition, the sachet extends beyond an edge of the structure.

17. (New) A polishing implement according to claim 13, wherein while in the closed condition, the protective layer is folded over and is sealed off along its edges, while the sachet is provided on the structure on one side of the fold.
18. (New) A polishing implement according to claim 17, wherein the sachet is attached to a bottom side of the structure and, in use, in the opened condition, extends beyond an edge of the structure and, when folded back, a portion of the sachet is attached to a top side of the structure.
19. (New) A polishing implement according to claim 13, wherein the structure comprises a glove.
20. (New) A polishing implement according to claim 13, wherein the structure comprises a handle and a relatively flat part forming a base for the sachet.
